Governmental Support Austria

Austrian Technology Corporation GmbH (ATC) is supported by the Federal Ministry of Agriculture, Regions and Tourism.

In line with an initiative of the Austrian government, ATC was established to promote interests of Austrian or Austrian based companies, active in technology related sectors, on their export markets.

ATC Austrian Technology Corporation unites Austrian Top companies, export financing banks, operators, research institutes and education providers and acts as coordinator and development platform, managing the internal and external relationship to international partners, thus ensuring the availability of all solutions and services jointly developed by industry and operators.

The central idea of this platform is the cooperation of internationally acting companies which have been successful in foreign trade for many years, to apply their knowledge and services for infrastructure & technology projects more effectively for the benefit of their partners.

ATC is the leading organization of export-oriented industry in Austria providing high tech solutions in many different areas, such as mobility & transport, environment protection, energy, agriculture, health care, ICT, e-government, education & training and others.

Austrian skills and experience in these fields enjoy high international reputation and large-scale application is a potential mean of assisting many countries in their efforts to improve their quality of life.

The development, the economic cooperation and the integrated strategy of ATC Austrian Technology Corporation matches the need for regional development.

That is the reason why ATC Austrian Technology Corporation receives our sincere support.
