

Governmental Support Austria

Austrian Technology Corporation GmbH (ATC) is supported by the Federal Ministry of Transport, Innovation and Technology.

In line with an initiative of the Austrian government ATC was established in order to promote interests of Austrian or Austrian based companies, active in technology related sectors, on their export markets.

ATC Austrian Technology Corporation unites Austrian Top companies, export financing banks and operators and acts as coordinator and development platform, managing the internal and external relationship to international partners and ensuring the availability of all solutions and services jointly developed by industry and operators.

The central idea of this platform is the cooperation of internationally acting companies in technology related areas, which have been successful in foreign trade for many years, to apply their knowledge and services for infrastructure projects more effectively for the benefit of their partners.

ATC is the leading organization of export-oriented industry in Austria providing high tech solutions in many different areas, such as the entire spectrum of construction works (e.g. buildings, roads, power plants, tunnelling), offset transactions, intelligent transportation systems electronic payment applications (all major electronic tolling technologies), traffic management & road telematics solutions, railway communications and information systems, manufacturing of CNC machines and automation systems for educational and industrial use, know-how transfer with comprehensive training concepts, mission critical communication equipment for customers in air traffic control, maritime, public safety, railways and the Armed Forces, environmental protection and waste management ("source-separated waste collection"), including technology for full landfill remediation, use of biogas from existing landfills, treatment plants, organic treatment (reduction of greenhouse gas emissions), leading Austrian cellular operator, conveying technology (conveying equipment, waste separation), municipal vehicles (sewer & street cleaning, waste disposal), sewage engineering (waste water & sludge treatment), development, testing and production of state-of-the-art mine detection equipment and unmanned aerial vehicle system (CAMCOPTER), consulting and engineering.

Austrian skills and experience in these fields enjoy high international reputation and large scale application is a potential mean of assisting many countries in their efforts to improve their quality of life.

The development, the economic cooperation and the integrated strategy of ATC Austrian Technology Corporation matches the search for a consistent technology policy.

That is the reason why ATC Austrian Technology Corporation receives our sincere support.
